Overview

Many of us are overwhelmed, and struggle with the constant distractions we face in our work. Information overload is a big problem. Juggling productivity and wellbeing successfully is a challenge.

It's no longer enough to just focus on "time management": it's time to think about how you manage your attention and focus, your projects and actions, your choices and habits.

A Productivity Ninja™ is calm and prepared, but also skilled and ruthless in how they deal with the many enemies of productivity and wellbeing.

We'll share with you the **9 Characteristics of the Productivity Ninja™**, and help you identify specific ways you can implement them.
